(72)Inventor : AOKI YOICHI
NAGATOMO SHOICHI**(54) INFORMATION SERVICE SYSTEM, INFORMATION MANAGEMENT EQUIPMENT, AND INFORMATION MANAGEMENT METHOD****(57)Abstract:**

PROBLEM TO BE SOLVED: To provide an information service system, an information management equipment and an information management method by which information can be served at low cost.

SOLUTION: When an external data entry section 81 detects the entry of information from an information service enterprise, an information processing engine 16 extracts transmission designation data (e.g. transmission designation date, transmission designation time, transmission area or transmission object party) from comment data given to the information and divides the information into message data, whose information amount is within an amount sent to a pager for one time. Then the transmission designation data and the divided message data are stored while relating to a contents file F4 in a database 17 in accordance with the transmission designation data extracted.
